David:

I conducted a quick review of the "Indian" 1 well in San Benito County. Although I have not had time yet to locate the CBD letter, I have discovered that the Division issued a project approval letter for a cyclic steam project on May 5, 2014. An aquifer exemption was not required as the zone water tested over 23,000 mg/l. This would refute CBD's claim of illegal injection. Please let me know if you have any questions.

Thanks,

Rob
